PROFILE

Data Analyst and Data Science graduate with hands-on experience in **data analysis, data cleaning, exploratory data analysis, and business intelligence**. Skilled in using **SQL Basics, Python, Power BI, and DAX** to transform raw data into meaningful insights and interactive dashboards. Experienced in analyzing business performance, identifying trends, tracking KPIs, and presenting data-driven insights to support decision-making. Strong understanding of data visualization, data modeling, and statistical analysis, with additional knowledge of **Machine Learning and predictive analytics**.

EDUCATION

Helwan International Technology University

2022 – 2026

Bachelor's Technology Degree in Data Science

CERTIFICATES

Machine Learning for Data Scientists — Mahara Tech ITI

- Covered machine learning fundamentals, data preprocessing, feature engineering, model building, and evaluation.

SQL Programming — MindLuster & DataCamp

- Developed skills in SQL querying, data manipulation, filtering, aggregation, joins, and working with relational databases.

Python Programming Basics — Mahara Tech ITI

- Learned Python fundamentals, data structures, functions, and basic programming concepts for data analysis.

Summer Training — Modern Gas Company & CIB Bank

- Applied data analysis and reporting techniques to real-world business data, gaining practical experience in data cleaning, analysis, visualization, and generating insights to support business decisions.

Introduction to AI, ML, and Quantum ML — Ministry of Youth and Sports

- Explored fundamental concepts of Artificial Intelligence, Machine Learning, and emerging Quantum Machine Learning technologies.

Artificial Intelligence — NTI & Huawei Talent

- Covered core AI concepts, machine learning fundamentals, and practical applications of Artificial Intelligence.

Data Analysis Using AI — Orange Digital Center

- Completed a **30-hour** training program covering data analysis, data cleaning, EDA, visualization, dashboards, AI-driven insights, prediction, and automation.
- **Grade: 100%** | February–March 2026

PROJECTS

Hospital Patient Face Recognition System

Computer Vision · Real-Time AI · Data Logging

- Developed a real-time patient identification and check-in system using Python, InsightFace, and OpenCV with 88%+ recognition confidence.
- Automated patient visit logging with Pandas/CSV, timestamps, and duplicate detection.
- Built a Tkinter GUI with live camera monitoring and patient registration.
- Optimized CPU-based inference while avoiding storage of raw facial images.

Tech Stack: Python · InsightFace · OpenCV · Pandas · NumPy · Tkinter

Bank Marketing Campaign Analysis & ML Prediction

Data Analysis · Business Intelligence · Machine Learning

- Analyzed 45K+ customer records to identify marketing performance and subscription drivers.
- Performed data cleaning, EDA, customer segmentation, and risk profiling using Python.
- Developed a classification model achieving 89% accuracy for term-deposit prediction.
- Built an interactive 5-page Power BI dashboard with campaign KPIs, segmentation, risk analysis, and ML predictions.

Tech Stack: Python · Pandas · NumPy · Scikit-learn · Power BI · Excel

IAAS Intelligence Platform — Graduation Project

AI Agent · Data Analysis · LLMs

- Developed an AI-powered conversational data analysis agent for CSV/Excel datasets using natural-language queries.
- Built data processing and Auto-EDA pipelines for cleaning, profiling, correlation, and statistical analysis.
- Integrated FastAPI with Ollama/LLMs to connect user queries with automated data analysis and insights.
- Contributed to AI-generated summaries, visualizations, and PDF reports as part of a 9-member team.

Tech Stack: Python · Pandas · NumPy · FastAPI · Ollama · LLMs · React

LANGUAGES

- **Arabic:** Native
- **English:** Intermediate — Technical Proficiency
